

Installation of Internet in 'School for life'

Report on donation

Dear Donors,

We are proud to have internet on the campus. The project of internet installation was carried out with your donation. It is completed and functioning well. We are very grateful to you for it. Now we can learn many things from websites. We can use social medias. We can search many information for learning.

Technology

'Teaching and learning' becomes easier and more effective when we use technologies in education.

Teachers guide how to use internet.

Internet and computers

It's great to have Internet at the school

Many thanks, donors! We can now use technology in education for the children. It is very helpful not only for the children but also for the teachers in teaching and learning.

Although we have only a few old computers for the kids, we can use internet group by group. We will try to use Apps for the kids to learn happily with a lot of fun.

- Teachers

Kids have more interest in learning

The kids are happy in answering quizzes and choices on online platforms.

Kids can learn more!

Using internet, the kids can do learning beyond what they have been taught.

- A teacher

Kids start to learn how to use internet.

Internet facilitates project-based learning (PBL) in 'School for Life'

Kids search information for projects

Great! We can now search more information and knowledge on websites for projects and find ways to improve our projects. We exchange ideas in the groups of project and discuss problems, weaknesses and strategies to carry out the projects.

- School for Life kids

Internet makes group work effective and better collaboration

Using internet, the kids have more different ideas and more creative thinking and problem solving skills than before.

Better communication

Using social media, communication between kids and teachers is better, thus it improves engagement in learning.

- A teacher

Kids use internet with mobile phone on weekends.
